

# SUMMER 2014

# IPAD TRAINING

## TOPICS

### • NEARPOD JUNE 11

Using this free app you can bring your classroom to life with interactive mobile presentations that allow you to create and customize yourself. We have heard your need to have time to create, so bring already created PowerPoints or Keynote presentations that you would like to make more interactive or be ready to start from scratch.

### • GOOGLE FOR EDUCATION JUNE 12

Learn how to effectively use Google online tools in your classroom by beginning the Level 1 lessons toward Google Certification: Gmail, Calendar, Docs & Drive, Sites, Search, and Chrome. Already taken care of Level 1? Sign up and get started on Level 2 courses toward your Google Educator Certification (small exam fee required).

### • MOODLE JUNE 30

Moodle is an online learning management system that allows teachers to create and deliver content, monitor student activity, facilitate collaborative learning, and assess students' progress. Teachers especially appreciate Moodle's rich quiz feature that enable teachers to create a variety of Checking For Understanding resources and summative assessments, manage when and how many times students can take them, and recycle them easily. Come learn the basics and begin setting up your courses today!

### • ITUNES U JULY 1

Participants will gain a fundamental understanding of curating content and publishing with iTunes U Course Manager. Learning outcomes for this workshop are the following:

- Experience iTunes U from the perspective of a course participant
- Understand how to organize and publish content with iTunes U Course Manager
- Explore strategies for leveraging iTunes U courses to enhance learning experiences

**ALL TRAININGS WILL BE HELD AT THE LEARNING CENTER  
9 AM-3PM (ONE HOUR LUNCH ON YOUR OWN)**
